Editor's Introduction xxi

Fundamental Methods for Historical Sociology

1. The Poverty of Deductivism: A Constructive Realist Model of Sociological Explanation 1
Philip S. Gorski

Response: Reasoning About History, Sociologically 35
Jack A. Goldstone

Response: Scientific Progress in a Nontheoretical Discipline: History and Constructive Realism 63
William H. Sewell Jr.

A Brief Rejoinder to Goldstone: The Varieties of Deductivism 71
Philip S. Gorski

Advances in Time and Space Measurement and Analysis

New Measures of Age, Period, and Cohort Effects

2. A Methodological Comparison of Age-Period-Cohort Models: The Intrinsic Estimator and Conventional Generalized Linear Models 75
Yang Yang, Wenjiang J. Fu, and Kenneth C. Land

Response:
Cohort Analysis Redux 111
Herbert L. Smith

3. Measures of Spatial Segregation 121
Sean F. Reardon and David O'Sullivan

4. Adjusting for Time-Varying Confounding in Survival Analysis 163
Jennifer S. Barber, Susan A. Murphy, and Natalya Verbitsky

New Applications and Methods for Network Analysis

5. Sampling and Estimation in Hidden Populations Using Respondent-Driven Sampling 193
Matthew J. Salganik and Douglas D. Heckathorn

6. Exponential Family Models for Sampled and Census Network Data 241
Laura M. Koehly, Steven M. Goodreau, and Martina Morris

New Measures of Measurement Quality

7. Assessing Bias in the Estimation of Causal Effects: Rosenbaum Bounds on Matching Estimators and Instrumental Variables Estimation with Imperfect Instruments 271
Thomas A. DiPrete and Markus Gangl

8. A New Approach to Evaluating the Quality of Measurement Instruments: The Split-Ballot MTMM Design 311
Willem E. Saris, Albert Satorra, and Germá Coenders

New Methods for Qualitative Data

9. A Mathematical Approach to Categorization and Labeling of Qualitative Data: The Latent Categorization Method 349

Kai R. Larsen and
David E. Monarchi
